## Hospitalization

Many practical details need to be settled before admission. If you wish, Advisor can take care of the admission procedures for non-emergency hospitalisation. If the hospital or clinic requires a guarantee of payment, Advisor will inform them of your insurance cover and coordinate the payment of medical bills.

In the event of an emergency hospitalisation, Advisor must be informed immediately in order to avoid any misunderstandings regarding your insurance cover. We would ask you to provide it with information about your hospitalisation, including the doctor's diagnosis, the date of admission and, if possible, the expected date of discharge, the type of treatment, etc.
